Subject Fw: Teck Cominco materials

The latest Teck Proposal. I do not know if you guys have received this or not.

They have added requirements for review (see things going to the administrator), but on the plus side, they have fleshed out the studies that they are proposing.

I would really appreciate a quick review. With regard to risk assessment, do we normally go to the individual level that they are suggesting i.e. they seem to suggest that they want to see actual impacts as apposed to potential.
